RE: Letter of Recommendation

This letter is to confirm, that Dream Light Digital was hired by our firm to develop several different POP and label product designs for our new product line. One of the most important items needed was a new pocket folder to be use in our presentation packages. We were in a dilemma due to our wide product range and markets that would use our line.

Jerry was asked to create a catchy look that would bring all of the markets together at first contact, and was given a short deadline in order to finish the project. Jerry was able to meet the deadline and create an outstanding pocket folder that was without a doubt more than we bargained for.

We were completely overwhelmed with his work and would highly recommend him for his creativity, his willingness to understand what the customer is seeking, being able to meet deadlines on time and his fair pricing which came in under budget, what a plus.

Thank you,

Edwin "E.T." Longo
